A 4.25.00				Update ECS Baseline Doc. fill in Block 28). Routine				
, , ,				17. Schedule 18. Cl(s) Impact: Low		Affected:		
					·	Estimated Cost:		
				None - Under 100K				
22. Source Reference: NCR (attach) Action Item Tech Ref. GSFC Other: N/A								
23. Problem: (use additional Sheets if necessary) Attached is a copy of the baseline for Release 5B Implementation Earth Science Data Model for the ECS Project. This Data Model includes Addendums I-IV and newly submitted Valids and Keywords for MODIS Instrument Team.								
24. Proposed Solution: (use additional sheets if necessary) Have the Data Management department post the updates to the data model technical paper for 5B to the EDHS Internal Server. Under the document posting website for Science Users' community, developers from Landover and the DAACs constituents access this information for references to the data model. In addition, send out hard copies to the stipulated individuals referenced on the next page. Lastly, send a cc:mail message to CM indicating the technical paper has been posted and to close the CCR as completed.								
25. Alternate Solution: (use additional sheets if necessary)  Post the softcopy of this document to the Science Users' Community Bulletin Board, Release 5 Developers bulletin board, and e-mail a softcopy to the DAACs constituents. This is considered of course a more time consuming approach, which should not be considered unless it is for workaround purposes only								
26. Consequences if Change(s) are not approved: (use additional sheets if necessary)  If the changes are not posted to the website for key personnel to access mentioned above and on the next page then there is a possibility for issues to arise as to whether or not the initial 5B Data Model baseline has been posted might occur.								
27. Justification for Emergency (If Block 15 is "Emergency"): N/A								
28. Site(s) Affected: DEDF DVC VATC DEDC GSFC LaRC NSIDC SMC AK DPL DEOC DIDG Test Cell Other
